Abdelrahman Almahdy - 52042

Abdelrahman Gamal - 52043

Introduction

In our project we aim to use a hospital information system to keep track of patients' records during their admittance in the Intensive Care Unit. To apply this system, we used C++ language and object-oriented programming. Our code of system consists of 5 classes : patient, doctor, ICU, prescription, and Hospital. Each class has its properties and methods, where patient class contains unique ID for the patient, his personal information, medical history, allergies and medical status, doctor class contains unique social security number, his personal information and his professional information, ICU class contains unique code and number, manager, and a set of beds numbered according to its capacity, prescription class contains unique code, the directions for each medication, and finally hospital class we use to connect all of these class to solve the requirements of the project.

Motivation :

In general, we look forward to improving the health system and facilitating communication in hospitals and obtaining information that pertains to the patient and the patient's medical history. Personally, improving the skills of coding C++ and OOP.

Tools:

Visual Studio 2015 ,C++ ,Visual C++ compiler,QT Creator.

Challenges and Problems:

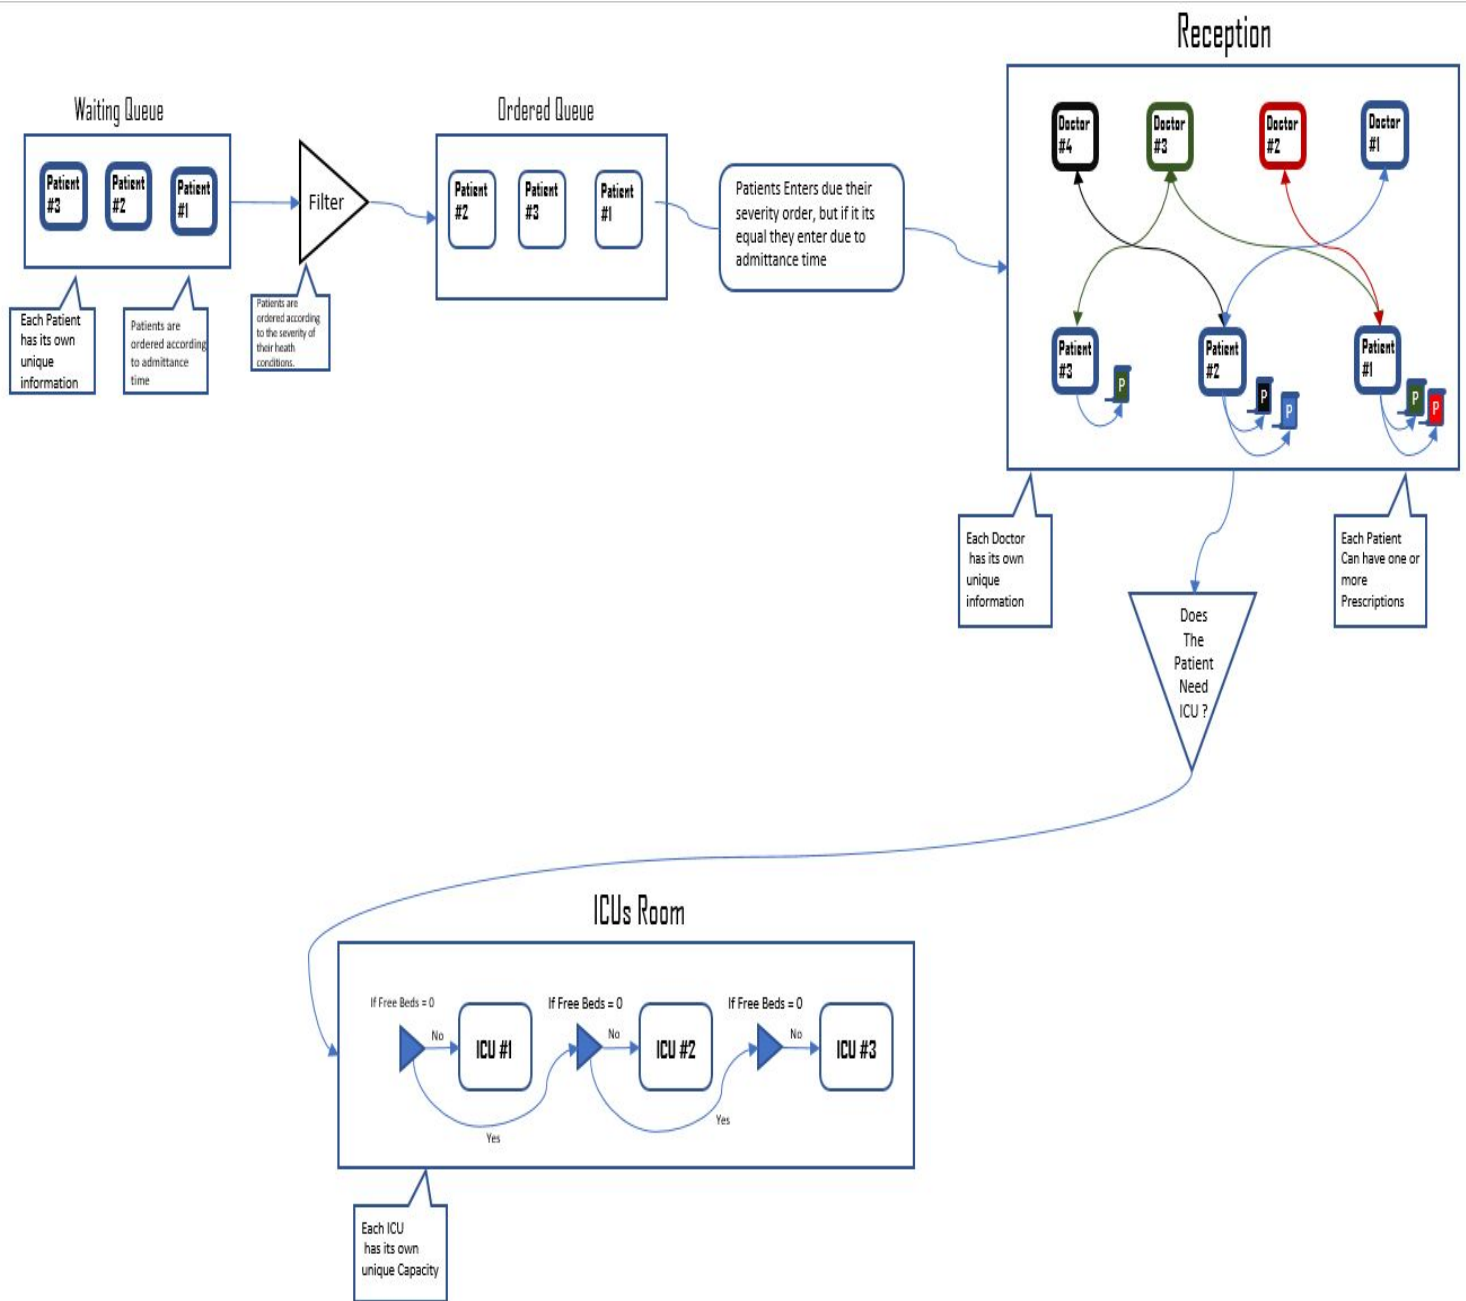

learning a course of OOP and graphical user interface(GUI).

learning pointer and pointer to pointer and send by reference.

Implementation of priority Queue.

Searching for open source projects in GitHub to simulate them.

Block Diagram

User manual Before GUI

When you run the code from the `main.cpp` file, you will be asked to

- Press 1 to assign new doctor
- Press 2 to add new patient
- press 3 to assign new ICU unit
- Press 4 to exit

```
Welcome to our system
Press 1 to assign new doctor , Press 2 to add new patient , press 3 to assign new ICU unit , press 4 to exit
```

› If you want to assign new doctor Press 1, then you will be asked to enter the following information

```
* Name
* Major
* Degree
* Birthdate
* sex
```

```

Welcome to our system
Press 1 to assign new doctor , Press 2 to add new patient , press 3 to assign new ICU unit , press 4 to exit
1
##Please enter doctor informations##
##enter name##
.
##enter major##
.
##enter degree##
.
##enter birthDate##
.
##enter sex##
.
Press 1 to terminate else Press 2 if you want to add new doctor

```

then you will be asked to press 1 to terminate or 2 to assign another doctor .

> If you press 1, doctor information will be displayed and you will return to the previous request to press 1 or 2 or 3 or 4

```
Press 1 to terminate else Press 2 if you want to add new doctor
1
##informations of added doctor##
Display Doctor with SSN: 100
Name : .
Birth date: .
Degree: .
Major: .
SEX: .
Press 1 to assign new doctor , Press 2 to add new patient , press 3 to assign new ICU unit , press 4 to exit
```

> if you want to add new patient press 2, then you will be asked to enter the following information

*Name *Address * Phone *Birthdate

* Sex *medical history * blood pressure *Allergies

* heart rate * temperature *severity level

```
Welcome to our system
Press 1 to assign new doctor , Press 2 to add new patient , press 3 to assign new ICU , press 4 to exit
2
##Enter Patient##
enter name
.
##enter address##
.
##enter pphone##
.
##enter birthDate##
.
##enter patient sex##
.
##enter medicalHistory##
.
##enter allergies##
0
##enter bloodPressure##

##enter heart rate ##
90
##enter temperature ##
37.5
##enter severity##
2
You have entered a new patient to our seystem with id= 1
press 1 to terminate or 2 to enter new patient
```

then you will be asked to press 1 to terminate or 2 to add another patient

> If you press 1, patient queue counter will increase 1 and you will be asked to press one to dequeue this patient or 2 to terminate

```
press 1 to terminate or 2 to enter new patient
1
##Dequeue Patients##
patients queue counter is 1
patients in hospital is 0
##dequeue patient press 1 terminate press 2##
```

> if you press 1, the patient will be dequeued and patient information will be displayed .

then you will return to the first request to press 1 or 2 or 3 or 4 .

```
##dequeue patient press 1 terminate press 2##
1
Personal INFO:

5
Press 1 to terminate else Press 2 if you want to add new ICU
```

then you will be asked to press 1 to terminate or 2 to add new ICU

> If you press 1 , the ICU information will be displayed and you will return to the first request to press 1 or 2 or 3 or 4 .

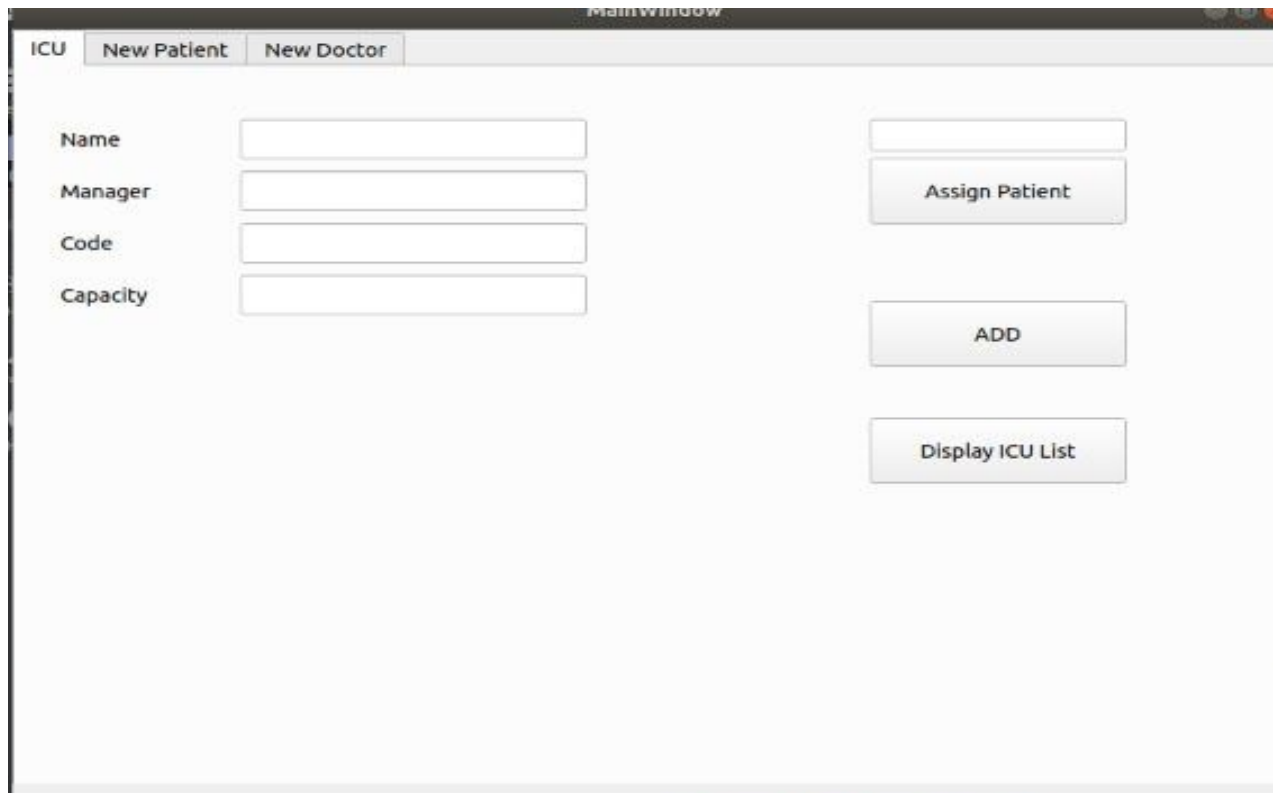

```
Press 1 to terminate else Press 2 if you want to add new ICU
1
##informations of added ICU##
the ICU of code : 2 and name : .
manager is :.
capacity is: 5
num of free beds is :5
Press 1 to assign new doctor , Press 2 to add new patient , press 3 to assign new ICU , press 4 to exit
```

> if you want to exit press 4

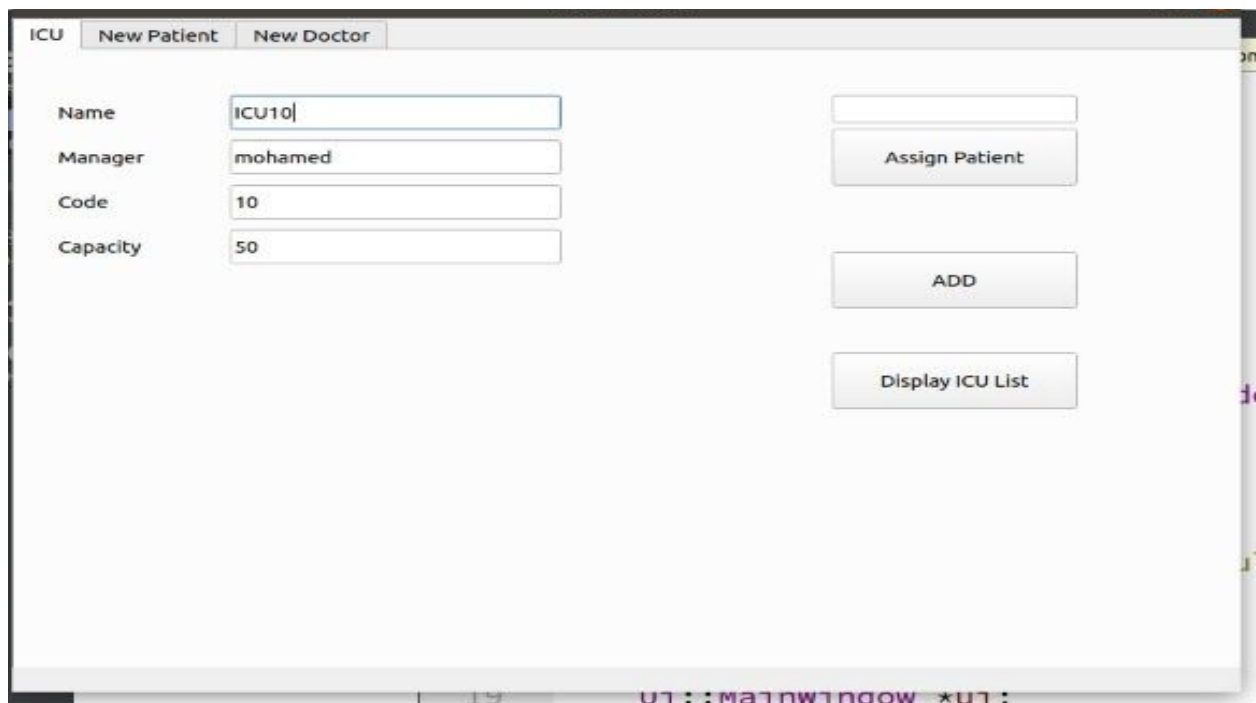

```
Welcome to our system
Press 1 to assign new doctor , Press 2 to add new patient , press 3 to assign new ICU , press 4 to exit
4

E:\visual studio\HIS\Debug\HIS.exe (process 17368) exited with code 0.
Press any key to close this window . . .
```

Screenshots for GUI program

The screenshot shows a window titled 'mainwindow' with three tabs: 'ICU', 'New Patient', and 'New Doctor'. The 'New Patient' tab is active. It contains four input fields on the left labeled 'Name', 'Manager', 'Code', and 'Capacity'. On the right, there are three buttons: an empty button at the top, 'Assign Patient' in the middle, and 'ADD' at the bottom. Below these is a 'Display ICU List' button.

The screenshot shows the same 'mainwindow' with the 'New Patient' tab active. The input fields are now filled: 'Name' contains 'ICU10', 'Manager' contains 'mohamed', 'Code' contains '10', and 'Capacity' contains '50'. The buttons on the right remain the same: an empty button at the top, 'Assign Patient' in the middle, 'ADD' at the bottom, and 'Display ICU List' at the very bottom.

Contribution

- * Ahmed Galal coded Hospital files and main file .
- * Abdelrahman Gamal coded patient files and ICU Files.
- * Abdelrahman Almahdy coded doctor Files and prescription files.
- * We all worked in GUI files and Priority queue.
- * we all helped each other in each file equally.
